- Rows Processed: 100,000
- Dirty Values: 1,562
- Errors Corrected: 1,418
- Confidence Avg: 0.9994

Recommendations

- Columns ['State', 'ZipCode', 'Condition'] show zero recall and require new rules or constraints.
- Columns ['CountyName', 'Score', 'Stateavg'] have low recall or precision and should be prioritized.
- The detector is conservative: anomaly ratio is low but recall is limited.

Column-level Analysis

MeasureName	Acceptable	0.7742	0.9600	0.6486
Score	Risky	0.6170	0.4579	0.9457
Sample	Good	0.8835	0.7913	1.0000
